

Passive spikes –S2000

Operation Type: SPRING-LOADED MANUEL

PRODUCT OVERVIEW

BGI S2000 Passive spikes

For lower security application, surface mounts 1-way spikes can be installed which incorporate spring loaded spikes which are lowered by the movement and weight of the car as it passes in the correct direction. Any attempt to pass over the spikes in the wrong direction will result in multiple tire punctures.

The S2000 can be a pre - order produced by incorporate a screw mechanism to allow them to be manually locked in the down position to temporary enable vehicles to pass in the wrong direction

Finish: Galvanized
