

Automatic Bollards – B5000

Operation Type: Electric/Hydraulic

PRODUCT OVERVIEW

BGI B5000 Security Automatic Bollards

Able to cope with a high number of operations per hour, this product can be a part of a large, secure access control scheme or operated as a standalone system.

The control board provided as standard is a plc control system which we can setup to meet whatever operational requirements you may have (push button, touch screen, card reader, LPR....).

Safety: we recommended for each project to choose the correct safety devices. like: Loop detector, photocell eyes, Traffic Light, a synchronize Arm Barrier.

Finish: Galvanized as standard with stainless steel cover, optional Led Light strip at the top.
